KRISHNA BALAJI

SOFTWARE ENGINEER · BACKEND SYSTEMS · AI INFRASTRUCTURE · DATA

krishna311004@gmail.com | linkedin.com/in/krishnabalaji | github.com/krishna31102004 | krishnabalaji.dev

Software engineer building reliable backend systems, AI infrastructure, and data-intensive applications.

EDUCATION

University of Illinois Urbana-Champaign | Master of Computer Science

Aug 2026 – May 2028

Arizona State University | B.S. Computer Science (Honors); Minor in Business · GPA 4.00/4.00

Aug 2022 – May 2026

EXPERIENCE

Circle.ooo | Software Engineering Intern

Sep 2025 – Apr 2026

- Implemented 41 REST API endpoints across 9 Node.js/Express route modules and designed a sponsorship recommendation engine with 6 weighted compatibility factors.
- Engineered workflows across 9 relational tables for messaging, proposal management, and Stripe checkout.

Arizona State University | Research Software Engineer Intern

Sep 2025 – Apr 2026

- Built XGBoost and LightGBM pipelines over 106,881 player-gameweek observations, achieving 0.70 mean Spearman correlation with walk-forward validation.
- Evaluated a rank-based signal on 11M+ historical selection records; a PuLP optimizer ranked in the top 0.9% on a blind holdout.

Quantiphi | Machine Learning Engineer Intern

May 2025 – Aug 2025

- Built Python ETL for 50,000+ monthly claims, reducing manual review time by 80%; improved document extraction accuracy from 72% to 90%.
- Deployed GCP microservices supporting a 25% reduction in claim approval cycle time.

SELECTED PROJECTS

BrowserProof — Reliability testing for AI browser agents; 10 browser/network fault types, 36 controlled scenarios, 90% seeded-failure detection, and reproducible CI regression tests.

Glassbox SRE — FastAPI, Redis, LangGraph, PostgreSQL, Prometheus, Slack; parallel incident analysis and a replayable 15-scenario benchmark. 86.7% top-1 commit identification accuracy vs. 13.3% heuristic baseline.

ATLAS — FastAPI, Redis, Polars, Parquet; analytics across 4,000+ tickers and 15M+ price points, sub-200ms P99 latency, and 80% less backtest query time.

TECHNICAL SKILLS

Backend & APIs: Node.js, Express, FastAPI, REST APIs | Data & ML: PostgreSQL, Redis, Polars, Parquet, XGBoost, LightGBM, PuLP | Infrastructure & integrations: GCP, Prometheus, Slack, Stripe, LangGraph | Languages: Python, JavaScript/TypeScript, SQL
